About Me

A detail-oriented Full-Stack Software Engineer trained at RevoU, possessing strong expertise in modern web development technologies such as **HTML, CSS, React, JavaScript, TypeScript, Next.js, Python, Flask, and MySQL** database management. Driven by a desire to grow in new environments, I have honed both business acumen and technical skills, enabling me to deliver customer-centric solutions to operational challenges. My background includes a solid foundation in the forklift rental industry gained through a year-long internship where I contributed to optimizing daily operations, reducing customer complaints, increasing market share, and successfully lowering accounts receivable. I have a proven track record of building strong client relationships, boosting customer satisfaction, and improving retention. Furthermore, I am committed to continuous learning and team collaboration to drive organizational efficiency.

Education:

Formal

Widyatama University | September, 2019 – May, 2024

Graduate

GPA: 3.41/4.00

Bachelor of Business Management

Training

RevoU | July, 2024 – December, 2024

Full-stack Software Engineering Program

- Intensive bootcamp focusing on modern web development technologies and practices.
- Developed full-stack applications using Next.js, TypeScript, and Python.
- Implemented secure authentication, RESTful APIs, and database management.
- Participated in collaborative group projects, enhancing teamwork and problem-solving skills.
- Engaged in hands-on coding exercises and workshops, solidifying theoretical knowledge through practical application.
- Presented final projects to a panel of industry experts for feedback and evaluation.

English

- Golden English | June 2024
- Mr. Bob | July, 2025 – August 2025
- Line Kampung Inggris | November, 2025 – December, 2025

Working Experiences:

Professional Experience Freelance Full-Stack Engineer

Remote, Indonesia | January 2025 – Present

1. RT/RW Management SaaS Platform (Sistem Informasi RT/RW) | Laravel, Tailwind CSS, Alpine.js, MySQL, Docker
[GitHub Repository](#)
 - Built a SaaS web application using Laravel with a dual-layout system (sidebar for desktop and bottom bar for mobile screens).
 - Created an emergency SOS Panic Button using WebSockets (Laravel Reverb) and Telegram Webhooks to send instant alerts to security groups.
 - Developed a financial ledger module to log neighborhood transactions, track cash automatically, and export reports to PDF and Excel.
2. Company Landing Page – Satria Forklift | HTML5, CSS3, JavaScript | [Live Website](#)
 - Designed and developed a responsive landing page for a forklift rental company to help boost incoming service inquiries.
 - Wrote clean HTML5 and custom CSS3 to make sure the website layout looks precise on both desktop and mobile screens.
 - Optimized navigation performance and interactive UI elements using JavaScript for faster page load times.
3. Official Event Landing Page – Bhinneka Run 2026 | [Live Website](#)
 - Created an interactive landing page for the Bhinneka Run event registrations using GSAP for smooth parallax scroll animations.
 - Added a real-time registration countdown timer built with vanilla JavaScript.
 - Applied mobile-first design principles to ensure the webpage stays lightweight, fast, and fully responsive on smartphones.

4. Corporate Landing Page – Puing Brangkal | [Live Website](#)

- Built a company profile website for a debris removal business to make it easier for clients to send inquiry forms.
- Implemented a simple navigation menu, responsive image assets, and smooth scrolling for a straightforward user experience.
- Optimized images and web assets to keep the page size small and load times fast.

Apprentise as Business Support,

CV Triputra Sarana Taqwa | July, 2020 – July, 2021

- Significant contributions to family business operations, enhancing adaptability and gaining a deep understanding of daily operational processes.
- Proactively addressed and resolved issues, reducing customer complaint resolution time by **30%** by escalating matters that hindered target achievement.
- Identified new business opportunities and implemented innovative strategies that successfully increased market share by **15%** within a year.
- Led a team in handling customer complaints and built positive relationships with clients, contributing to a **25%** increase in customer satisfaction and **20%** in customer retention while ensuring a collection rate of **98%** for accounts receivable.

Organization Experiences

Human Resources Department - Galeri Investasi | August 2021 – August 2022

- Successful organization of a financial literacy workshop that trained over 20 participants with a satisfaction rate of 95%, providing better understanding of investment strategies.
- Development and implementation of a marketing campaign targeting the Investment Gallery program, resulting in a 15% increase in participant participation within one year.
- Management of daily operations, including addressing member inquiries and coordinating investment activities, leading to a 10% increase in event attendance through improved engagement strategies.
- Design and implementation of initiatives to enhance member participation, successfully resolving 50% of member inquiries promptly, thus improving internal communication efficiency.

Technical skills

- Programming Languages: TypeScript, Python, JavaScript
- Frontend Frameworks: Next.js, React.js, Tailwind CSS
- Backend Framework: Flask
- Dependency Management: Poetry
- Database Management: MySQL
- RESTful API: API implementation and management
- Authentication: JWT (JSON Web Tokens)
- Version Control System: Git
- Software Development Tool: Postman

Additional Information

Soft Skills: Strong work ethic, Problem solving, Communication skills, Team collaboration, Detail oriented, Adaptability

Certification: 1. [Full-stack Software Engineering Certificate](#) | Issued by RevoU Course 21 December 2024
